OUR MISSION

YOUR VOICE
HEARD

Our goal is to assist you in walking confidently and comfortably, free from pain.

At South County Artificial Limb and Brace, our priority is ensuring every patient feels heard, comfortable, and fully informed about their footcare options.

HOW CAN WE HELP?

WHAT ARE WOUND CARE ORTHOTICS?

Wound care orthotics are custom-made devices that can help severe wounds heal by reducing pressure and limiting movement. They can also help prevent further injury or breakdown.

HOW DOES THE PROCESS WORK?

We're proud to offer a personalized, hands-on experience with our clients. After receiving your prescription and notes from your physician, we'll schedule an appointment to evaluate and cast you. At our facility, we blend cutting-edge scanning technology with traditional plaster casting techniques to ensure thoroughness and precision.

WOUND CARE

ORTHOTICS

CROW BOOTS

- Custom designed to meet individual wound care requirements.
- A comfortable fit and the right support.
- Promotes wound healing.

CUSTOM MOLDED SHOES

- Designed to accommodate & protect wounds on the feet.
- Provides cushioning & support.
- Reduces friction and pressure.

INSOLES/INSERTS

- Designed to offload pressure from specific areas of the foot.
- Provides cushioning & support to promote healing.

ANKLE-FOOT ORTHOSES

- Provides stability & support to the ankle and foot.
- Offloads pressure from specific areas.
- Helps to prevent further damage to wounds & promote healing.

PRESSURE GUARDIAN

- A pressure sensor tool combining instantaneous-pressure load measurement with a compatible app that collects, stores and transmits data.
